SCHOOL REPORT.

The School Board respectfully submit this Sixth Annual Report.

The work of the schools the past year, in the main, reflects credit upon the teachers and pupils. In some respects a marked improvement is manifested. Our teachers have labored intelligently and faithfully, and have shown themselves anxious to keep abreast with the times, to seek the best methods, to avail themselves of every suggested improvement; in short, to make their work more thorough and practical from term to term. The schools, as a rule, are well governed, with hardly an exception they have been quiet and orderly and industrious. The intervention of the School Board in matters of discipline is seldom necessary; and complaints on the part of the parents are of rare occurrence. The record of attendance has been greatly marred, during the winter term by the prevailing epidemic; but only one school has been obliged to suspend, and that for only a few weeks, on account of the illness of the teacher. But on the whole, we think, the record of attendance will compare favorably with that of former years.

The school property of the town is, for the most part, in good condition, and adequate to the needs of the schools. Some changes and improvements are needed, however. In the interest of the health of the pupils and also as a measure of economy in the end, some of the school rooms should have better ventilation, especially is this the case

in the village primary and grammar school rooms. The school house at Rowe's Corner is sadly in need of new seats and a general improvement all around. In the opinion of the Board, the usual appropriation for repairs should be made.

The matter of an overcrowded school room in the primary department, which has been referred to in former reports has been obviated by the establishment of a parochial school, thereby reducing the attendance at this school by nearly one half.

It would be impossible within the limits of a brief report to present all the facts respecting the schools in town which ought to demand the attention of their patrons.

Our common schools are the glory and pride of New England, and they ought to be the pride of every friend of education, and especially, of the education of the masses. The child of wealth and of the day laborer meet upon the common level, occupy the same seats, study the same text books, and so start on an equality on the race of life. That our schools may be still more efficient for the promotion of intelligence, morality and refinement let us bring to their management more liberality and more interest.
